BENEFITTING

# CAMP SUNSHINE

Children with cancer are normal children with special needs who want to participate fully in the everyday experiences of growing up. Camp Sunshine provides programs throughout the year to give children with cancer the opportunity to enjoy normal activities like swimming, horseback riding, arts and crafts, and making friends!

Camp Sunshine offers a variety of programs, which encompass the entire family—brothers, sisters and parents! A network of support is made up of other families experiencing the challenges of fighting cancer.

Often isolated from their peers due to their illness and the demands of treatment, the children who attend Camp Sunshine programs realize they're not alone in their struggle with cancer. They gain new strength and hope from others who have faced similar problems and positive effects last far beyond the brief time spent at camp. We believe the friendships the children make through Camp Sunshine will give them encouragement and hope as they face the challenges of childhood cancer.

In addition to paid professionals staff, Camp Sunshine has dedicated volunteers who help, as well as medical professionals who can administer medication and other types of treatment to children with cancer. All volunteers participate in an extensive application and training process and must pass a background check.

For updated information on all Camp Sunshine events, view the programming calendars on our web site.

## TAKE A CLUB TO CANCER

Our family, for the past ten years, has been affected by cancer. We have cancer survivors and unfortunately we have had victims of this horrible disease. We realize that great research is being undertaken around the world at fine hospitals and clinics and this research is supported by public and private sources. Great strides are being made everyday. Sadly, we are not researchers or doctors, so we couldn't help that way. However, we can organize a golf tournament and raise a little money.

Camp Sunshine is a reputable non-profit organization and we know raising money would help support these kids who are fighting everyday. We ask that you join us playing golf, buying a sponsorship, or making a donation. Every dollar adds up and maybe the one that makes a difference in a child attending Camp Sunshine. Kylie, our eleven-year-old daughter, is the main reason why we put this annual golf tournament together. Kylie was diagnosed with Neuroblastoma when she was two years old. This is a late diagnosis for this cancer and all information we received was not favorable. However, through the efforts of talented doctors and nurses at Children's Healthcare of Atlanta, the love of her family and friends, and countless prayers of the community, she survived.

Kylie attends Camp Sunshine now. She enjoys every minute of her stay. She enjoys fishing, horse back riding, the talent show and all the other countless activities.

Kylie Kersh and Kyle Lograsso 2007 Take A Club to Cancer. Kyle is a neuroblastoma survivor. He has been featured in Golf Digest and the Golf Channel.
